

Hello RCWC Customers!

With hotter temperatures and continuous dry conditions we thought we would update everyone on our watering restrictions. We have moved to Stage 2-Moderate . I have listed the restrictions below.

- NO WATERING Monday, Thursday, or Friday
- Watering is allowed **30 minutes per week** (15 minutes twice a week)
- Odd addresses: Water Tuesday and Saturday 6:00am-10:00am and 6:00pm to 9:00pm
- Even addresses: Water Wednesday and Sunday 6:00am-10:00am and 6:00pm to 9:00pm
- Handheld buckets and shut-off hoses? Always okay.
- Reclaimed/greywater? Go for it anytime.
- **Pools/Spas get one initial filling only (recirculating water only).** No draining and refilling
- Car washing is allowed anytime IF you're using a bucket or a hose with a shut-off.
- Construction-Water use restricted to what regulatory agencies require — dust control water must be reclaimed or effluent.

Why This Still Matters

Roosevelt County sits in an arid part of New Mexico — and drought conditions don't fix themselves.

Every gallon we save directly protects our local supply going into the hottest part of the year.

And yes... YOU are part of the solution.

Every resident. Every household. Every business. Every single good habit.

Together, we're not just keeping Portales running — we're a tiny but mighty part of the global water conservation success story.

Everyone stay cool, hydrated, and safe out there

Conserve our most precious resource

We have done so good the last few years, let's keep it up Roosevelt County!!
